## Theme of the day

Today I interviewed my neighbor Paweł, who was on a trip to Ireland.

T: Hi Paweł. Could I ask you a few questions?

P: Hello. Yes, I just have time.

T: Since when still when did you there and why?

P: I was in Ireland 4 years ago on a trip from school because the school organized courses for students. My job was taking orders from customers in an online shop. It was my first job and also a job abroad.

T: Okay. Next question. What things did you visit and see?

P: I visited many monuments there, but I remembered the mighty cliffs, because the views I saw there were amazing, but I also visited castles and churches which were beautiful.

T: It must have been a beautiful view. How much time did you spend there?

P: I was there for a month because that was the working time for me in the shop.

T: Did you see a famous person?

P: Unfortunately, not because I was working all the time and there was no time to go out and meet someone famous.

T: Who did you there with?

P: I was there with my classmates. In total, there were about 20 of us with the teacher.

T: How do you rate this trip?

P: This trip to Ireland was great and I would like to visit this country again.

T: Thank you for your time. See you soon!

P: Also thank you.

Paulina Gawliczek

## Cycling in Bytom

The cycling is a very nice option to spend your free time. On the section of the Bytomka river valley between Łagiewniki and Szombierki, post-mining areas were modernized.

Many bicycle paths have been created, on which you can ride a bike in the bosom of nature, surrounded by flora and fauna.

It is a great place away from the busy streets.

The bicycle routes are of different difficulty and there is something for everyone.

Karolina Burg

Interview with Senator Dorota Tobiszowska

1. How long have you been in politics?

I was interested in politics from an early age. In the family home, politics was always talked about and current political affairs were commented on. In 2014, I became the Councilor of the City of Ruda Śląska. Another term in the City Council was interrupted by my participation in the Senate of the Re-public of Poland.

2. How long have you been a senator?

In the elections on October 13, 2019, I was elected a Senator of the Republic of Poland.

6. How long were you a councilor in Ruda Śląska? What matters did the residents address to you?

I was the Councilor of the City of Ruda Śląska in the 2014-2018 and 2018-2019 terms. I sat on the Law, Family and Budget Committee. Each month I was on duty in the various districts of my election period. The residents turned to me as the Councilor with various matters, but most of all:

- housing matters
- damaged roads or sidewalks
- related to the education in our city

3. What is your profession?

I am a lawyer by profession, but also an economist technician.

4. How are the Senate debates going?

Senate meetings are held every month and last several days. Sometimes there are two settlements in one month. Very often the Senate deliberates until late at night.

5. Have you had the opportunity to talk to the president of Poland?

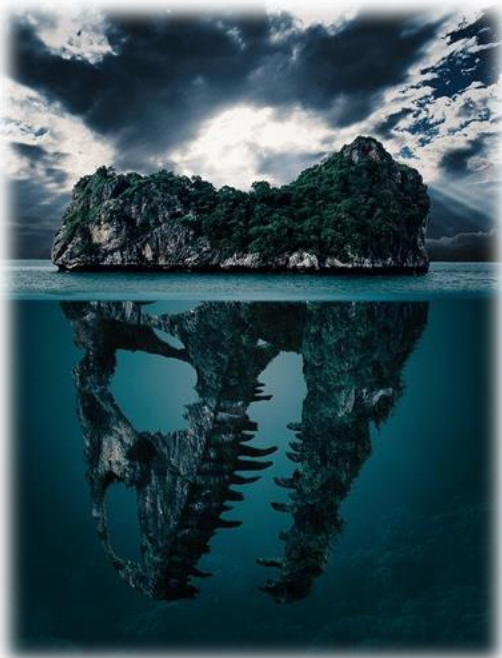

I talked to the current President of Poland several times, and before that I took part in his election campaign.

6. How long were you a councilor in Ruda Śląska? What matters did the residents address to you?

7. What was the funniest situation at the Sen-ate meeting?

During the session of the Senate of the Republic of Poland I looked at the SMS and found out that I was a "hero on Twitter". I was surprised and a bit scared because I did not know what was going on. It turned out that of my entire political group, I was the only one sitting in the Meeting Room. Since this event, my popularity on Twitter has grown significantly

Review of the movie "Jurassic Park"

Last Sunday, I watched a very cool film – “Jurassic Park” by Steven Spielberg. This movie is based on the book of the same name. Other directions have made sequels to this classic, but none of these films reflect the atmosphere of the original.

Action of this hit takes during paleontological excavation in Montana. There we meet Dr. Alan Grant, who together with his assistant Dr. Ellie Sattler are looking for fossils. One day, a dinosaur maniac John Hammond arrives to the camp and offers a couple of scientists a lot of money in exchange for checking out his new park. After arriving to island where the park was located, our paleontologists learned that this jet park was a dinosaur park, where these reptiles live. The visitors also visited the genetic laboratories and later, together with John’s grandchildren went on a ride on the educational trail with dinosaurs. And this trip turned apparently pleasant adventure into a real hell.

I like this film because I love actions and fantastical movies. During the screening of this film, I was haunted by many emotions. They were : excitement, fear, joy and relief. I especially love this film for the music created by my favorite compositor – John Williams.

## Miechowice forest in 4 seasons
